

# Policy of Excellence

**ASTI**

MOBILE  
ROBOTICS

ASTI Mobile Robotics' vision is to establish itself as a global benchmark for intralogistics automation and systematisation solutions by increasing clients' competitiveness and flexibility and reducing their time to market. ASTI fully acknowledges both the importance of social, economic and environmental sustainability and its commitment to society. In line with this, it has implemented a management system designed to make ASTI a leader in safety and new technology and inculcate an organisation-wide **culture of excellence and innovation**.

## ASTI and its team members undertake to:

- ▶ Embody the ASTI **values** of dynamism, customer service, teamwork, innovation, respect and humility.
- ▶ Meet the **deadlines agreed** with our external and internal clients and promote relationships based on **professionalism** and **transparency** throughout the life-cycle of our products and services.
- ▶ Extend our commitment to **right-first-time quality**, product safety and innovation beyond our organisation and apply it to the **entire value chain**, including implementation of our products and services in our clients' facilities.
- ▶ **Comply with all legislation applicable** to our products and services, including that related to employee health and safety, as well as with that required by clients, by the ISO 9001 standard and by all others that the organisation adopts.
- ▶ Ensure the **health and safety** of all our team members in the firm belief that accidents, injuries and occupational diseases are preventable.
- ▶ **Continually improve** management system effectiveness by providing the necessary resources and establishing and encouraging team members' participation and motivation and enhancing their skill levels through continuing professional development;
- ▶ **Monitor advances in technology** and encourage innovative ideas that allow us to identify the opportunities and challenges facing ASTI's business and so anticipate market changes.
- ▶ Define and keep up to date an integrated excellence management system that meets our **clients' requirements**, facilitates **regular review** and **mitigates organisational risk** through action plans and achievement of the targets set in the Strategic Plan.

These premises are the only way to ensure operational excellence and sustained success. The management of ASTI likewise undertakes to ensure that corporate policy is known to, understood and applied by all team members and is available to all stakeholders. It also undertakes to communicate our **PASSION FOR EXCELLENCE AND SUSTAINABLE COMPETITIVENESS** to all stakeholders that place their faith in us.
